## Who We Are

ALFATEK is an IT Managed Service Provider and a Software Development Group that offers management for the enterprise networks, covering all of the subjects from managing the Domain Controllers, network peripherals, Web-Traffic, Firewall Security, Databases and storages to integration with cloud base SaaS, PaaS and IaaS solutions. Additionally, our development team provides software and app development that is produced based on the client requirements and specifications. ALFATEK offers more business services directed to simplify your business processes and to offload your internal resources.

## Differentiators & Competitive Advantage

Our main goal is to reduce cost while increasing effectiveness. We know how IT should operate since ALFATEK is formed and managed by IT Experts.

- ALFATEK has developed its own COTS software products to assist in the automation of functions of the business, AIM ([aimxpert.com](http://aimxpert.com)) and cross-monitoring and alerting platform MONX ([monxpert.com](http://monxpert.com)).
- Experience implementing modernization strategies and cutting-edge technologies.
- 24/7 Emergency Service, National Coverage
- Decades of IT Program Management and IT Operation
